

FARRIA

Catalogue 2023

Since 2006, "Agro-Oven's" Broiler Division has set a high standard in chicken production, maintaining facilities that include three modern poultry farms, an incubator, a top-notch feed mill, an extensive meat processing unit, a rendering plant, and three contemporary multi-profile laboratories.

Our production cycle is thorough and precise, from growing grains to selling to consumers, ensuring our chicken meets the highest quality and taste standards. We focus on maintaining excellent quality and affordable pricing by investing in the latest production technologies, making our products competitive globally.

We use advanced Dutch equipment of the "Mayn Food Processing" company that allows us to reach a performance of more than 107,000 tons of poultry per year and have a manufacturing capacity of up to 13000 chicken broilers per hour. The processing line provides slaughtering, feather removal, eviscerating, chilling broiler meat, weight sizing, cutting, packing, and freezing.

"Agro-Oven" has forged numerous prosperous partnerships worldwide, delivering frozen poultry products to clients across various countries. Our products are made following Islamic dietary laws (Halal), meeting the needs of Muslim consumers globally. Our corporate vision is centered around creating enduring partnerships founded on stability, mutual respect, and trust with associates from all corners of the world.
